3300 XL 8mm Proximity Transducer System
Product Datasheet
Bently Nevada* Asset Condition Monitoring

Description

The 3300 XL 8 mm Proximity Transducer System consists of:

• One 3300 XL 8 mm probe,
• One 3300 XL extension cable₁, and
• One 3300 XL Proximitor* Sensor².

The system provides an output voltage that is directly proportional to the distance between the probe tip and the observed conductive surface and can measure both static (position) and dynamic (vibration) values. The system’s primary applications are vibration and position measurements on fluid-film bearing machines, as well as Keyphasor* reference and speed measurements³.

The 3300 XL 8 mm system delivers the most advanced performance in our eddy current proximity transducer systems. The standard 3300 XL 8 mm 5-meter system also fully complies with the American Petroleum Institute’s (API) 670 Standard (4th Edition) for mechanical configuration, linear range, accuracy, and temperature stability. All 3300 XL 8 mm proximity transducer systems provide this level of performance and support complete interchangeability of probes, extension cables, and Proximitor sensors, eliminating the need to match or bench calibrate individual components.

Each 3300 XL 8 mm Transducer System component is backward compatible and interchangeable⁴ with other non-XL 3300 series 5 mm and 8 mm transducer system components⁵. This compatibility includes the 3300 5 mm probe, for applications in which an
8 mm probe is too large for the available mounting space.\(^6\)

**Proximitor Sensor**

The 3300 XL Proximitor Sensor incorporates numerous improvements over previous designs. Its physical packaging allows you to use it in high-density DIN-rail installations. You can also mount the sensor in a traditional panel mount configuration, where it shares an identical 4-hole mounting “footprint” with older Proximitor Sensor designs. The mounting base for either option provides electrical isolation and eliminates the need for separate isolator plates. The 3300 XL Proximitor Sensor is highly immune to radio frequency interference, allowing you to install it in fiberglass housings without adverse effects from nearby radio frequency signals. The 3300 XL Proximitor Sensor’s improved RFI/EMI immunity satisfies European CE mark approvals without requiring special shielded conduit or metallic housings, resulting in lower installation costs and complexity.

The 3300 XL’s SpringLoc terminal strips require no special installation tools and facilitate faster, more robust field wiring connections by eliminating screw-type clamping mechanisms that can loosen.

**Proximity Probe and Extension Cable**

The 3300 XL probe and extension cable also reflect improvements over previous designs. A patented TipLoc* molding method provides a more robust bond between the probe tip and the probe body. The probe’s cable incorporates a patented CableLoc* design that provides 330 N (75 lbf) pull strength to more securely attach the probe cable and probe tip.

You can also order 3300 XL 8 mm probes and extension cables with an optional FluidLoc* cable option. This option prevents oil and other liquids from leaking out of the machine through the cable’s interior.

**Connectors**

The 3300 XL probe, extension cable, and Proximitor sensor have corrosion-resistant, gold-plated ClickLoc* connectors. These connectors require only finger-tight torque (the connectors will “click” when tight), and the specially-engineered locking mechanism prevents the connectors from loosening. These connectors require no special tools for installation or removal.

You can order the 3300 XL 8 mm probes and extension cables with connector protectors already installed. We can also supply connector protectors separately for field installations (such as when an application must run the cable through restrictive conduit). We recommend connector protectors for all installations to provide increased environmental protection.\(^8\)

**Extended Temperature Range Applications**

An extended temperature range (ETR) probe and ETR extension cable are available for applications in which either the probe lead or extension cable may exceed the standard 177 °C (350 °F) temperature specification. The ETR probe has an extended temperature rating for up to 218 °C (425 °F). The ETR extension cable rating is up to 260 °C (500 °F). Both the ETR probe and cable are compatible with standard temperature probes and cables, for example, you can utilize an ETR probe with the 330130 extension cable. The ETR system uses the standard 3300 XL Proximitor Sensor. Note that when you use any ETR component as part of your system, the ETR component limits the system accuracy to the accuracy of the ETR system.
**Description Notes:**

1. One-meter systems do not use an extension cable.

2. Proximitor sensors are supplied by default from the factory calibrated to AISI 4140 steel. Calibration to other target materials is available upon request.

3. Consult Bently Nevada* Applications Note, Considerations when using Eddy Current Proximity Probes for Overspeed Protection Applications, when considering this transducer system for tachometer or overspeed measurements.

4. 3300 XL 8 mm components are both electrically and physically interchangeable with non-XL 3300 5 mm and 8 mm components. Although the packaging of the 3300 XL Proximitor Sensor differs from its predecessor, its design fits in the same 4-hole mounting pattern when used with the 4-hole mounting base, and will fit within the same mounting space specifications (when minimum permissible cable bend radius is observed).

5. Mixing XL and non-XL 3300-series 5 mm and 8 mm system components limits system performance to the specifications for the non-XL 3300 5 mm and 8 mm Transducer System.

6. The 3300-series 5 mm probe (refer to Specifications and Ordering Information document 141605) uses smaller physical packaging, but does not reduce the side view clearances or tip-to-tip spacing requirements as compared to an 8mm probe. It is used when physical (not electrical) constraints preclude the use of an 8mm probe. When your application requires narrow side view probes, use the 3300 NSv* Proximity Transducer System (refer to Specifications and Ordering Information document 147385).

7. 8 mm probes provide a thicker encapsulation of the probe coil in the molded PPS plastic probe tip. This results in a more rugged probe. The larger diameter of the probe body also provides a stronger, more robust case. We recommend that you use 8 mm probes when possible to provide optimal robustness against physical abuse.

8. Each 3300 XL extension cable includes silicone tape that you can use instead of connector protectors. We do not recommend silicone tape for applications that will expose the probe-to-extension cable connection to turbine oil.

---

**Specifications**

Unless otherwise noted, the following specifications are for a 3300 XL 8 mm Proximitor Sensor, extension cable and 8 mm probe between +18 °C and +27 °C (+64 °F to +80 °F), with a -24 Vdc power supply, a 10 kΩ load, an AISI 4140 steel target, and a probe gapped at 1.27 mm (50 mils). Performance characteristics apply to systems that consist solely of 3300 XL 8 mm components. The system accuracy and interchangeability specifications do not apply to transducer systems that are calibrated to any target other than our AISI 4140 steel target.

**Electrical**

**Proximitor Sensor Input**

Accepts one non-contacting 3300-series 5 mm, 3300 8 mm or 3300 XL 8 mm Proximity Probe and Extension Cable.

**Power**

Requires -17.5 Vdc to -26 Vdc without barriers at 12 mA maximum consumption, -23 Vdc to -26 Vdc with barriers. Operation at a more positive voltage than -23.5 Vdc can result in reduced linear range.

**Supply Sensitivity**

Less than 2 mV change in output voltage per volt change in input voltage.

**Output Resistance**

50 Ω

Extension Cable Capacitance

69.9 pF/m (21.3 pF/ft) typical

Field Wiring

0.2 to 1.5 mm$^2$ (16 to 24 AWG). Recommend using 3 conductor shielded triad cable and tinned field wiring. Maximum length of 305 meters (1,000 feet) between the 3300 XL Proximitor Sensor and the monitor. See the frequency response graphs, Figures 10 and 12, for signal rolloff at high frequencies when using longer field wiring lengths.

Linear Range

2 mm (80 mils). Linear range begins at approximately 0.25 mm (10 mils) from target and is from 0.25 to 2.3 mm (10 to 90 mils) (approximately –1 to –17 Vdc).

Recommended Gap Setting for Radial Vibration

-9Vdc [approximately 1.27 mm (50 mils)]

Incremental Scale Factor (ISF)

Standard 5 or 1 meter System:

7.87 V/mm (200 mV/mil) ± 5% including interchangeability error when measured in increments of 0.25 mm (10 mils) over the 80 mil linear range from 0 °C to +45 °C (+32 °F to +113 °F).

Standard 9 meter System:

7.87 V/mm (200 mV/mil) ± 6.5%
including interchangeability error when measured in increments of 0.25 mm (10 mils) over the 80 mil linear range from 0 °C to +45 °C (+32 °F to +113 °F).

Linear Range

2 mm (80 mils). Linear range begins at approximately 0.25 mm (10 mils) from target and is from 0.25 to 2.3 mm (10 to 90 mils) (approximately –1 to –17 Vdc).
mils) over the 80 mil linear range from 0 °C to +45 °C (+32 °F to +113 °F).

Extended Temperature Range (ETR) for 5 and 9 Meter Systems:

7.87 V/mm (200 mV/mil) ± 6.5% including interchangeability error when measured in increments of 0.25 mm (10 mils) over the 80 mil linear range from 0 °C to +45 °C (+32 °F to +113 °F).

Deviation from best fit straight line (DSL)

Standard 5 or 1 meter System:

Less than ±0.025 mm (±1 mil) with components at 0 °C to +45 °C (+32 °F to +113 °F).

Standard 9 meter System:

Less than ±0.038 mm (±1.5 mil) with components at 0 °C to +45 °C (+32 °F to +113 °F).

Extended Temperature Range 5 and 9 meter Systems:

Less than ±0.038 mm (±1.5 mil) with components at 0 °C to +45 °C (+32 °F to +113 °F).

Performance over Extended Temperatures

Standard 5 or 1 meter System:

Over a probe temperature range of −35 °C to +120 °C (−31 °F to +248 °F) with the Proximitor sensor and extension cable between 0 °C to +45 °C (+32 °F to +113 °F), the ISF remains within ±10% of 7.87 V/mm (200 mV/mil) and the DSL remains within ±0.076 mm (±3 mils).

Over a probe and extension cable temperature range of −35 °C to +260 °C (−31 °F to +500 °F) with the Proximitor sensor between 0 °C to +45 °C (+32 °F to +113 °F), the ISF remains within ±18% of 7.87 V/mm (200 mV/mil) and the DSL remains within ±0.152 mm (±6 mils).

Over a Proximitor sensor and extension cable temperature range of −35 °C to +65 °C (−31 °F to +149 °F) with the probe between 0 °C to +45 °C (+32 °F to +113 °F), the ISF remains within ±10% of 7.87 V/mm (200 mV/mil) and the DSL remains within ±0.076 mm (±3 mils).

Standard 9 meter System:

Over a probe temperature range of −35 °C to +120 °C (−31 °F to +248 °F) with the Proximitor sensor and extension cable between 0 °C to +45 °C (+32 °F to +113 °F), the ISF remains within ±10% of 7.87 V/mm (200 mV/mil) and the DSL remains within ±0.152 mm (±6 mils).

Extended Temperature Range 5 and 9 meter Systems:

Over a probe temperature range of −35 °C to +120 °C (−31 °F to +248 °F) with the Proximitor sensor and extension cable between 0 °C to +45 °C (+32 °F to +113 °F), the ISF remains within ±10% of 7.87 V/mm (200 mV/mil) and the DSL remains within ±0.152 mm (±6 mils).

Over a probe temperature range of −35 °C to +120 °C (−31 °F to +248 °F) with the Proximitor sensor and extension cable between 0 °C to +45 °C (+32 °F to +113 °F), the ISF remains within ±10% of 7.87 V/mm (200 mV/mil) and the DSL remains within ±0.152 mm (±6 mils).

Frequency Response

(0 to 10 kHz), +0, -3 dB, with up to 305 meters (1000 feet) of field wiring.
Minimum Target Size

15.2 mm (0.6 in) diameter (flat target)

Shaft Diameter

Minimum:

50.8 mm (2 in)

Recommended Minimum:

76.2 mm (3 in)

Note: When gapped at the center of the linear range, the interaction between two separate transducer systems (cross-talk) will be less than 50 mV on shaft diameters of at least 50 mm (2 in) or greater. You should take care to maintain minimum separation of transducer tips, generally at least 40 mm (1.6 in) for axial position measurements or 38 mm (1.5 in) for radial vibration measurements to limit cross-talk to 50 mV or less. Radial vibration or position measurements on shaft diameters smaller than 76.2 mm (3 in) will generally change the scale factor.

Effects of 60 Hz Magnetic Fields up to 300 Gauss

Mechanical

Probe Tip Material

Polyphenylene sulfide (PPS).

Probe Case Material

AISI 303 or 304 stainless steel (SST).

Probe Cable Specifications

Standard cable:

75Ω triaxial, fluoroethylene propylene (FEP) insulated probe cable in the following total probe lengths: 0.5, 1, 1.5, 2, 3, 5, or 9 meters.

Extended Temperature Range cable:

75Ω triaxial, perfluoroalkoxy (PFA) insulated probe cable in the following total probe lengths: 0.5, 1, 1.5, 2, 5, or 9 meters.

Armor (optional on both):

Flexible AISI 302 or 304 SST with FEP outer jacket.

Tensile Strength (Maximum Rated):

330 N (75 lbf) probe case to probe lead.

270 N (60 lbf) at probe lead to extension cable connectors.

Connector Material:

Gold-plated brass or gold-plated beryllium copper.

Environmental Limits

Probe Temperature Range

Operating and Storage Temperature

Standard Probe:
-51 °C to +177 °C (-60 °F to +350 °F)

Extended Temperature Range Probe:
-51 °C to +218 °C (-60 °F to +425°F) for the probe tip; -51 °C to +260 °C (-60 °F
to +500 °F) for the probe cable and connector.

**Note:** Exposing the probe to temperatures below -34 °C (-30 °F) may cause premature failure of the pressure seal.

**Probe Pressure**

3300 XL 8 mm probes are designed to seal differential pressure between the probe tip and case. The probe sealing material consists of a Viton® O ring. Probes are not pressure tested prior to shipment. Contact our custom design department if you require a test of the pressure seal for your application.

**Note:** It is the responsibility of the customer or user to ensure that all liquids and gases are contained and safely controlled should leakage occur from a proximity probe. In addition, solutions with high or low pH values may erode the tip assembly of the probe causing media leakage into surrounding areas. Bently Nevada, LLC will not be held responsible for any damages resulting from leaking 3300 XL 8 mm proximity probes. In addition, 3300 XL 8 mm proximity probes will not be replaced under the service plan due to probe leakage.

**Extension Cable Temperature Range**

**Operating and Storage Temperature**

**Standard Cable:**

-51 °C to +177 °C (-60 °F to +350 °F)

**Extended Temperature Range Cable:**

-51 °C to +260 °C (-60 °F to +500 °F)

**Proximitor Sensor Temperature Range**

**Operating Temperature**

-51 °C to +100 °C (-60 °F to +212 °F)

**Storage Temperature**

-51 °C to +105 °C (-60 °F to +221 °F)

**Relative Humidity**

Less than a 3% change in Average Scale Factor (ASF) when tested in 93% humidity in accordance with IEC standard 68-2-3 for up to 56 days.
## Ordering Information

**Note:** For a detailed listing of country and product specific approvals, refer to the Approvals Quick Reference Guide (document 108M1756) located at the following website: [www.GEmeasurement.com](http://www.GEmeasurement.com).

### Ordering Information for Probes

#### 3300 XL 8 mm Proximity Probes:

- **330101**  3300 XL 8 mm Probe, 3/8-24 UNF thread, without armor
- **330102**  3300 XL 8 mm Probe, 3/8-24 UNF thread, with armor

**Part Number-AXX-BXX-CXX-DXX-EXX**

#### A: Unthreaded Length Option

**Note:** Unthreaded length must be at least 0.8 inches less than the case length.

- Order in increments of 0.1 in
- **Length configurations:**
  - **Maximum unthreaded length:** 8.8 in
  - **Minimum unthreaded length:** 0.0 in
- **Example:** 0 4 = 0.4 in

#### B: Overall Case Length Option

- Order in increments of 0.1 in
- **Threaded length configurations:**
  - **Maximum case length:** 9.6 in
  - **Minimum case length:** 0.8 in
- **Example:** 2 4 = 2.4 in

#### C: Total Length Option

- **0 5** 0.5 meter (1.6 feet)
- **1 0** 1.0 meter (3.3 feet)
- **1 5** 1.5 meter (4.9 feet)
- **2 0** 2.0 meters (6.6 feet)
- **3 0** 3.0 meters (9.8 feet)
- **5 0** 5.0 meters (16.4 feet)
- **9 0** 9.0 meters (29.5 feet)

**Note:** 3-meter length option is only available on 330101 probes, and are designed for use with the 9 meter Proximitior sensor only.

### Ordering Information for Probes, Metric:

- **330103**  3300 XL 8 mm Probe, M10 x 1 thread, without armor
- **330104**  3300 XL 8 mm Probe, M10 x 1 thread, with armor

**Part Number-AXX-BXX-CXX-DXX-EXX**

#### A: Unthreaded Length Option

**Note:** Unthreaded length must be at least 20 mm less than the case length.

- Order in increments of 10 mm.
- **Length configuration:**
  - **Maximum unthreaded length:** 230 mm
  - **Minimum unthreaded length:** 0 mm
- **Example:** 0 6 = 60 mm

#### B: Overall Case Length Option

- Order in increments of 10 mm.
- **Metric thread configurations:**
  - **Maximum length:** 250 mm
  - **Minimum length:** 20 mm
- **Example:** 0 6 = 60 mm

5-meter probes are designed for use with the 5 meter Proximitior sensor only.

#### D: Connector and Cable-Type Option

- **0 1** Miniature coaxial ClickLoc connector with connector protector, standard cable
- **0 2** Miniature coaxial ClickLoc connector, standard cable
- **1 1** Miniature coaxial ClickLoc connector with connector protector, FluidLoc cable
- **1 2** Miniature coaxial ClickLoc connector, FluidLoc cable

#### E: Agency Approval Option

- **0 0** Not required
- **0 5** CSA, ATEX, IECEx Approvals

3300 XL 8 mm Proximity Probes, Metric:

- **330103**  3300 XL 8 mm Probe, M10 x 1 thread, without armor
- **330104**  3300 XL 8 mm Probe, M10 x 1 thread, with armor

**Part Number-AXX-BXX-CXX-DXX-EXX**
**C: Total Length Option**

0 0 Not required
0 5 CSA, ATEX, IECEx Approvals

Aluminum probe clamp bracket

137491-AXX

A: Mounting screw option

0 1 10-24 UNC-2A mounting screws
0 2 M5 x 0.8-6g mounting screws

The aluminum clamp bracket is an unthreaded mounting bracket designed for use with the smooth case probes (330140, 330141, 330197 and 330198). After gapping the probe, tighten the clamp bracket by tightening the screws. The mounting screws have pre-drilled holes for safety wire.

Aluminum probe threaded mounting bracket

137492-AXX

A: Thread size

0 1 3/8-24
0 4 M10 x 1

The aluminum probe threaded mounting bracket is the standard mounting bracket for most 3300 and 3300 XL probe installations. The -01 option includes two 10-24 UNC-2A mounting screws. The -04 option includes two

A: Overall Case Length Option

Order in increments of 0.5 in

Length configurations:

Maximum length: 9.5 in
Minimum length: 1.0 in
Example: 3 5 = 3.5 in

B: Total Length Option

Part Number: 141194-01
Rev. AC
M5 x 0.8-6g mounting screws. The mounting screws have pre-drilled holes for safety wire.

**Phenolic threaded probe mounting bracket**

**27474-AXX**

**A:** Thread size

- **01** 3/8-24
- **04** M10 x 1

Bently Nevada recommends the phenolic threaded mounting bracket if your application requires additional electric isolation from the mounting location (as in some generator and electrical motor bearing locations). The -01 option includes two 10-24 UNC-2A mounting screws. The -04 option includes two M5 x 0.8-6g mounting screws. The mounting screws have pre-drilled holes for safety wire.

**Probe Ordering Information Notes:**

1. Mounting clamps must be ordered separately for 330140, 330141, 330197, and 330198.

2. For a shorter delivery time, order commonly stocked probes. The following part numbers are currently stocked probes:

- 0 0 Not required
- 0 5 CSA, ATEX, IECEx Approvals

**Accessories**

**141078-01**

Manual.

**175751**

**3300 XL Multi-Purpose Stainless Steel Housing.** 12”x12”x6”. Can hold up to 8 Proximitor Sensors in a DIN-mount configuration or 6 Proximitor Sensors in a panel-mount configuration. (Available with ATEX Zone 0 and Zone 1 certifications.)
176467

**3300 XL Multi-Purpose Stainless Steel Housing.** 12”x8”x6”. Can hold up to 4 3300XL Proximitor Sensors in both DIN-mount and panel-mount configurations. (Available with ATEX Zone 0 and Zone 1 certifications.)

330181

**3300 XL Multi-Purpose Stainless Steel Housing.** 13”x9.5”x7”. Can hold up to 8 Proximitor sensors in a DIN-mount configuration or 6 Proximitor Sensors in a panel-mount configuration. Primarily used by customers requiring hazardous area approvals for their installations. Available with ATEX Zone 0 and Zone 1 and North American Division 1 and Division 2 certifications.

02120015

**Bulk field wire.** 1.0 mm2 (18 AWG), 3 conductor, twisted, shielded cable with drain wire. Specify length in feet.

138492-01

**Replacement panel-mount mounting pad.**

138493-01

**Replacement DIN-mount mounting pad.**

148722-01

**3300 XL test plug.** The 3300 XL Test Plug contains 3 small test pins attached to 3 color-coded 1-meter wires, each terminated in a banana plug. The 3-pin adapter plugs into the test pin holes on 3300 XL-style Proximitor sensors. You can use this test plug to check the performance of the Proximitor sensor from the test pin holes in the terminal strip without removing the field wiring.

04310310

**3300 XL Proximitor Sensor panel-mount screw.** One 6-32 UNC thread forming mounting screw. Four screws are required for each Proximitor sensor. (Screws supplied standard with Proximitor housings [3300 XL panel-mount option]).

03200006

**Silicone self-fusing tape.** A 9.1-meter (10-yard) roll of silicone tape to protect connectors. This tape is easy to install and provides excellent electrical isolation and protection from the environment. We do not recommend using this tape inside the casing of the machine.

40113-02

**Connector Protector Kit.** Connector Protector Kit for 3300 XL 8 mm probes and extension cables, including connector protectors and installation tools.

136536-01

**Connector protector adapter.** This allows you to use connector protector installation tools manufactured prior to 1998 with 75Ω ClickLoc connectors.
**Connector protectors.** Package contains 10 pairs of connector protectors for 3300 XL 8 mm probes and extension cables.

03839410

**75Ω triaxial male connector protector.** Male connector protectors install onto the extension cable and attach to the female connector protector on the probe, providing environmental protection of connectors.

03839420

**75Ω triaxial female connector protector.** Female connector protectors install onto the probe lead and attach to the male connector protector on the extension cable, providing environmental protection of connectors. You can also place the connector protector onto the extension cable to slide over the connection to the Proximitor sensor to protect that connection from the environment.

330153-01

**3300 XL connector kit.** Used on 3300 XL 8 mm probes and extension cables. Contains 1 pair each of male and female ClickLoc connectors, 2 color-coded sleeves, 2 pieces of slit FEP tubing, and 1 strip of silicone tape.

330153-09

**3300 XL ETR Connector Kit.** Used on ETR 3300 XL 8mm probes and 3300 ETR XL extension cables. Contains one pair of male and female ClickLoc connectors, two color-coded sleeves, two pieces of high temperature slit FEP tubing, and one strip of silicon tape.

163356

**Connector Crimp Tool Kit.** Includes 1 set of multiconnector inserts and connector installation instructions. Compatible only with 330153 connector kits or with probes shipped in 2003 or later with ClickLoc connectors uninstalled. Supplied with carrying case.

04301007

**3/8-24 probe lock nut with safety wire holes.** Single probe lock nut with 2 holes drilled through the nut in order to secure the lock nut in place with safety wire.

04301008

**M10 x 1 probe lock nut with safety wire holes.** Single probe lock nut with 2 holes drilled through the nut in order to secure the lock nut in place with safety wire.

**Figure 17: Physical Mounting Characteristics Showing Interchangeability of 3300 and 3300 XL Proximitor Sensors when 4-hole Mounting Option Is Used**

**Figure Notes:**

1. All dimensions on figures are in millimeters (inches) unless otherwise noted.
2. Standard mount 8 mm probes supplied with M17 or 9/16 inch lock nut.
3. Probes ordered with 5 or 9 meter integral cables have a length tolerance of +20%, -0%.
4. Reverse mount probes not available with armor or connector protector options.
5. Letters inside quotation marks on figures refer to probe ordering options.
6. Stainless steel armor is supplied with FEP outer jacket for standard probes, PFA outer jacket for ETR probes.
7. FEP jacket is standard non-armored portion of the cable for standard probes, PFA jacket on non-armored portion for ETR probes.
8. Use M3.5 or #6 screws for panel-mount Proximitor Sensors (screws provided when purchasing Bently Nevada housings).
